

# Viktoria Vonsovykh

## Junior Frontend Developer

I am a passionate Frontend Developer looking for new challenges. I decided to switch to IT because I enjoy working with numbers and data, I like both - to create solutions via code and seeing how my code works on screen. Every task is something new and as a developer I should find solutions how to implement it - that is what I like a lot at this profession! It has been couple of years since I am learning Frontend development and participating as a volunteer Web Developer in various projects.
